INTERNET AND WIFI SERVICES AT SEA

Silversea is pleased to provide complimentary Internet service to all guests aboard our ships fleetwide.

As there are no "cell" towers or cable networks at sea or in many of the remote places we visit, Silversea uses cutting-edge satellite technology that is far different than the high-speed broadband you are likely accustomed to on land.

At sea - whether you are accessing web pages, newsfeeds, email, etc. - data is transmitted from the ship to a satellite in space. The satellite then sends the data to a ground station on earth to connect to an internet service provider (ISP) and then back to the ship. The distance that the data must travel is called "latency" and it is due to this process that onboard Internet access may be inconsistent, or in some cases, not available. Satellite communications are also affected by weather and the ship's location.

LET'S CELEBRATE NATIONAL & INTERNATIONAL FOOD & BEVERAGE DAYS

TODAY: Sticky Bun Day (USA)

At Silversea Cruises, we take maximum food precautionary measures to ensure the safest quality product is offered to our guests; Worldwide Public Health Services advise that consuming raw or undercooked meats, seafood, shellfish, eggs, milk, or poultry may increase your risk of food-borne illness, especially if you have certain medical conditions.

HAND WASHING & HAND SANITIZING

Keeping hands clean through improved hand hygiene is one of the most important steps we can take to avoid getting sick and spreading germs to others. Many diseases and conditions are spread by not washing hands with soap and clean, running water. Alcohol-based hand sanitizers can quickly reduce the number of germs on hands. Please use the hand sanitizers situated at the entrance door of the dining outlets and various locations around the ship.
