This outing on Komodo Island offers a rare opportunity to observe the legendary Komodo dragon in the wild.

Park rangers accompany you on a walk to the dragon-viewing area. The hike along narrow paths requires walking in single file on compact mud or loose gravel.

At the viewing point, some time is made available to discretely observe the reptiles.

Learn more about the island's fearsome creatures and shop for souvenirs before returning to the jetty and transferring back to the ship.

KOMODO, INDONESIA

KOMODO DRAGONS EXIST NOWHERE EXCEPT ON THIS VOLCANIC ISLAND

Komodo, the volcanic island of giant lizards, lies 320 miles (515 kilometres) east of Bali. Komodo is 25 miles (40 kilometres) long and 12 miles (19 kilometres) wide; its parched hills ascend to a height of 2,410 feet (734 metres). Komodo is home to a community of some 2000 people who make their living primarily from fishing.

The island is the centrepiece of the Komodo National Park, where you will find the most tangible legacy left behind from the Jurassic Era. Komodo Island was little-known and the Komodo dragons were only a myth until the giant lizards were scientifically described in 1912. Extinct almost everywhere else, the island attracts thousands of visitors from all over the world who come to see the Komodo dragons in their natural habitat.

Komodo National Park has been declared a UNESCO World Heritage Site and Biosphere Reserve. The Komodo dragon's great bulk and weight are its most unique characteristics; even hatchlings average 20 inches (51 centimetres) in length. The adult male can reach 10 feet (3 metres) and weigh up to 330 pounds (150 kilos). Females attain only two-thirds of this size, and lay up to 30 eggs at a time.

With their saw-like teeth, these fierce creatures are able to rip apart a deer, goat or wild pig. The animals have an uncanny sense of smell, and are considered among the world's most intelligent reptiles. They are quite agile over short distances, and can move swiftly to capture their prey. The Indonesian Directorate of Nature Conservation (PPA) administers Komodo National Park.

Park Rangers must escort all visitors; independent exploration of the park is not permitted.

TODAY: Popcorn Lover's Day (USA) + Potato Chip Day (USA)

At Silversea Cruises, we take maximum food precautionary measures to ensure the safest quality product is offered to our guests; Worldwide Public Health Services advise that consuming raw or undercooked meats, seafood, shellfish, eggs, milk, or poultry may increase your risk of food-borne illness, especially if you have certain medical conditions.

HAND WASHING & HAND SANITIZING

Keeping hands clean through improved hand hygiene is one of the most important steps we can take to avoid getting sick and spreading germs to others. Many diseases and conditions are spread by not washing hands with soap and clean, running water. Alcohol-based hand sanitizers can quickly reduce the number of germs on hands. Please use the hand sanitizers situated at the entrance door of the dining outlets and various locations around the ship.
